

FOOTHILL FARM

ST IGNATIUS, MT

Foothill Farm is a multi-generational, diversified operation located in Western Montana's Mission Valley. The farm's close-knit crew of family members and staff love growing delicious, healthy food for their local communities. They produce both grass-finished beef and Certified Organic vegetables using a system that integrates livestock and centers on regenerative methods like cover cropping, crop rotations, composting, and rotational grazing. These practices feed the rich soils from which the farm's exceptionally flavorful tomatoes, squash, garlic, and herbs spring forth each season.
