

# FLATHEAD LAKE CHEESE

## POLSON, MT

"The idea to change our lives and become cheese makers sprung from a moment of inspiration while soaking in the backyard hot tub," write founders Wendi & Joe Arnold. "Sometimes those are the best ideas, the wild ones, the dreams." We wholeheartedly agree! The pair settled on a site in the heart of Polson, just steps from the south shore of the bay, and built their facility from the ground up. Among other stand-out features, their iconic two-story, bright yellow creamery building is crowned with solar panels that power their thermal pasteurization process.
