

MONTRAIL BISON

ST. IGNATIUS, MT

Montrail Bison is a family-based company that raises free-roaming bison under open skies in the foothills of Western Montana's iconic Flathead Mountains. Their "farm gate to plate" philosophy centers on providing communities with the highest quality products possible. All of their animals are humanely raised without the use of synthetic hormones or antibiotics. And leading a low-stress life on open pasture ultimately makes for healthier meat—every cut is rich in protein, vitamin B, and heart-healthy omega-3s.
